ABSTRACT

Current and historical data on the Connecticut State Technical College System and its five component parts are provided in this report. Section I presents information on headcount and full-time enrollment trends by program and campus; credit and contact hours; student attrition by term; full- and part-time enrollments; and student characteristics (i.e., age, sex, ethnicity, and residence). Section II provides data on class size in lecture and laboratory classes, and a frequency distribution of course sections by class size. Section III offers data on community college faculty by college, ethnic group, sex, rank, and area of technical expertise. Graduation and placement data are presented in section IV, including degrees and certificates awarded, placement by campus, graduate employment patterns, transfer patterns, and companies employing 1988 graduates. Finally, section V presents selected financial data, including a summary of tuition and general fund expenditures, a statement of income and expenses for the educational extension fund, information on the distribution of expenditures, and eight-year comparisons of costs per student per credit per contact hour by college.
